

# Y-DNA GROUP R1-168

## SNP TREE FROM BIG Y TEST RESULTS

(Rev. 21 Feb. 2017)

Z17653 and FGC13518 are known SNPs. All others are novel variants that were found from Big Y tests at Family Tree DNA. This is a subset of the R Haplogroup Y-SNP chart at [www.gravesfa.org/R-Y-SNP-chart.pdf](http://www.gravesfa.org/R-Y-SNP-chart.pdf). The genealogy charts for this are the individual ones for each genealogy. The purpose of the SNP testing and this chart is to determine how the various genealogies that share a common Graves/Greaves ancestor are connected, and to eventually define individual branches of each genealogy.
