

Y-DNA GROUP R1-228b SNP TREE FROM BIG Y TEST RESULTS

(Rev. 28 May 2017)

The date/age estimates in red are by Dr. Iain McDonald and are from his table at www.jb.man.ac.uk/~mcdonald/genetics/table.html. More information can be seen at www.jb.man.ac.uk/~mcdonald/genetics.html.

Gen. 220,
Kit 226679
Gen. 77,
Kit 477043

S15663, Z2001 and BY12505 are known SNPs. All others are novel variants that were found from Big Y tests at Family Tree DNA. This is a subset of the R Haplogroup Y-SNP chart at www.gravesfa.org/R-Y-SNP-chart.pdf. The genealogy chart for this is at www.gravesfa.org/DNAchart228-connections.pdf. The purpose of the SNP testing and this chart is to determine how the various genealogies that share a common Graves/Greaves ancestor are connected, and to eventually define individual branches of each genealogy.

It isn't known whether these SNPs are older or newer than S15663 and BY12505. They are shared by all kits.
