

Descendants of James Graves and Ann Ellis of Sawbridgeworth, Hertfordshire, England  
(Gen. 244)  
(Rev. 7 May 2012)

NOTES: This chart shows male lines of descent only, since the focus is on using Y-DNA analysis to trace the Graves surname.

Men with the Graves surname are needed for testing. Once tested, the following comments will apply.

The number in each bottom colored box is the DNA test ID.

All boxes with the same color have the same DNA test results.

24 of 25 means that 24 of the 25 DNA markers matched the inferred ancestral haplotype.

A notation like 13-19 indicates a mutation from the ancestral haplotype, and means marker 13 had a value of 19.
