

Descendants of Josiah Graves of MA (Gen. 289)

(Rev. 13 Sept. 2005)

NOTES: This chart shows male lines of descent only, since the focus is on using Y-DNA analysis to trace the Graves surname.

Once we get DNA test participants from this family, the following statements will apply:

The number in each bottom colored box is the DNA test ID.

When two descendants of a common ancestor have exactly the same DNA test results, it is assumed that the common ancestor also had that result, and all boxes up to and including the common ancestor have been given the same color.

All boxes with the same color have the same DNA test results.

24 of 25 means that 24 of the 25 DNA markers matched the inferred ancestral haplotype.

A notation like 13-19 indicates a mutation from the ancestral haplotype, and means marker 13 had a value of 19.

It is not yet known whether Josiah descends from Thomas Graves of Hartford, CT (genealogy 168) or from Rear Adm. Thomas Graves of Charlestown, MA (genealogy 28). DNA test participants from this family are needed.
