

# Descendants of Enos Graves of Randolph Co., NC (Gen. 789)

(Rev. 16 Aug. 2011)

NOTES: This chart shows male lines of descent only, since the focus is only using Y-DNA analysis to trace the Graves surname. Descent through female lines is not shown on this chart.

There is only 1 Y-DNA test result for this family so far. Until there is a second test result, there is nothing to compare this result with. When there are more, the following statements will apply:

The number in each bottom colored box is the DNA test ID.

All boxes with the same color have the same DNA test results.

24 of 25 means that 24 of the 25 DNA markers matched the inferred ancestral haplotype.

A notation like 13-19 indicates a mutation from the ancestral haplotype, and means marker 13 had a value of 19.
