

Descendants of Benjamin Graves and Judy Graves of Brunswick Co., VA (Gen. 979)
(Rev. 14 Aug. 2011)

This chart is an exception to the usual rule that only all male lines are shown. This is because the Graves name is shown in the chart through several lines. It would therefore be expected that the Y-DNA of all Graves descendants would bear the same Y-DNA. Ancestral DNA being split by recombination.

NOTES: This chart shows male lines of descent only, since the focus is only using Y-DNA analysis to trace the Graves surname. Descendants through female lines is not shown on this chart.
There are no Y-DNA test results for this family yet. When there are, the following statements will apply:
The number in each box is the Y-DNA test ID.
All boxes with the same color have the same Y-DNA test results.
2nd of 20 means that 2 of the 20 Y-DNA markers matched the national ancestral haplogroup.
1st of 20 indicates a mutation from the ancestral haplogroup, and means that at 1 had a value of 20.
