

Descendants of Benjamin Greaves of Surrey, England and Barbados, West Indies (Gen. 813)

(Rev. 13 May 2022)

NOTES: This chart shows male lines of descent only, since the focus is on using Y-DNA analysis to trace the Greaves surname.

The number in each bottom colored box is the DNA test ID.
All boxes with the same color have the same DNA test results.
24 of 25 means that 24 of the 25 DNA markers matched the inferred ancestral haplotype.

A notation like 13-19 indicates a mutation from the ancestral haplotype, and means marker 13 had a value of 19.
